Shielded Bulbs

MAIL-IN BOX INSTRUCTIONS

- Tape the bottom of the box closed.
- Insert the polyliner into the box and fold down over the top of the box.
- Add any accepted lamps into the plastic lined box. You may accumulate bulbs for up to one year before needing to recycle them. We recommend writing the accumulation start date on the box.
- Do not tape bulbs together. If you are ready to return your box and it isn't quite full, use plastic bags, bubble wrap or other "padding" to fill in any empty spaces in the box.
- Once you are ready to send the box back to us, fold the excess plastic over the end of the bulbs to keep them contained, then tape the top closed.
- Bring the box to any FedEx drop off location!
- To reorder, simply call, email or visit us online.
- Your Certificate of Recycling will be sent to you once we have received your Mail In Box.
